

This activity can be completed using the 'square number cards' that are included in this folder. The children have already made a set to 50 which I have sent home.

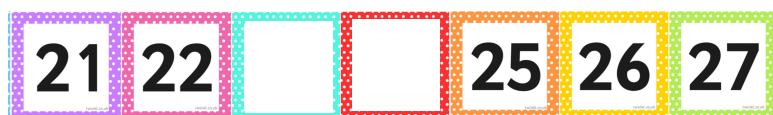

Activity 1. Number card games.

'What's my number?'

Put the number cards in sequence, either in one long line or in a grid pattern as in the picture. Ask your child to look away, then turn some of the cards. Ask them to say what the numbers are on the turned cards.

Extend to short sequences
not starting at 0 or 1.

Turn over consecutive cards.

When confident try a sequence
counting down instead of up.

Extend the number range when your child is ready.
